Dear Participants,

We need your assistance in resolving a problem that has been developing with our very successful PG Concours Auto Rally. Due to the number of cars in the event, the excessive space left between cars is making the Rally increasingly difficult to manage for the Police, Highway Patrol, Pebble Beach and the City of Carmel. To address this difficulty the event is being restricted to 200 cars again this year. The reduction in the number of participants will reduce the donations we are able to give to the PG Youth Center and Carmel Youth Fund.

In order to maintain the event at 200 cars, the Rally Committee requests that the event travel at 25-30 miles/hour and you leave no more than 2-3 car lengths between you and the car in front of you.

We cannot stress this enough as the size of the event could be further reduced. Even with our police assistance, we need your help to keep the group together in order to provide a quality rally and fun experience for everyone.

If you wish to participate in the rally, it is vitally important that you agree to maintain the appropriate minimum distance between cars.
